Summary

I am a skilled Web Developer with a strong focus on **backend development** and hands-on experience in **frontend technologies**. Passionate about designing and building scalable, efficient, and secure web applications, I specialize in leveraging the latest tools and frameworks to deliver high-quality, maintainable code. I thrive in collaborative environments and am committed to solving complex challenges to create user-centric, performance-driven solutions.

Experience

Dermatologist Skincare

Backend Software Developer

Feb 2024 - Jul 2024

- **Developed Scalable Backend for Healthcare Platform:** Built the backend using **Node.js**, **Express.js**, and **Apollo Server for GraphQL**, enabling seamless communication between the frontend and server for efficient data retrieval.
- **Implemented Low-latency Video Call Feature:** Designed and integrated a real-time video call system for online appointment sessions between users and dermatologists, ensuring a smooth and reliable experience.
- Keep the code quality high reviewing code from other developers and suggesting improvements
- **Engineered Appointment Booking System:** Created a dynamic appointment scheduling functionality, enabling users to book, manage, and conduct sessions with dermatologists directly on the platform.
- **Automated Report Generation with Dynamic PDF Support:** Developed a feature to dynamically generate, view, and email user reports and prescriptions in a professional PDF format.**Automated Report Generation with Dynamic PDF Support:** Developed a feature to dynamically generate, view, and email user reports and prescriptions in a professional PDF format.
- **Integrated Payment Processing with Stripe:** Built a payments system using **Stripe API** to handle transactions securely for paid consultations and services.
- **Performance Optimization:** Achieved high scores on Lighthouse performance metrics by optimizing website speed, implementing SEO best practices, and generating sitemaps for improved discoverability.
- **Deployed Backend Infrastructure on AWS:** Ensured high availability and scalability by hosting the backend on **AWS**

Cheers AI

Full Stack Developer

Sep 2023 - Jan 2024

- Designed and implemented a robust chatbot leveraging OpenAI and vapi that offers conversational therapy support with emotions to users.
- **Integrated Real-time Call Feature:** Built a seamless voice call functionality to enable real-time communication between users and therapists.
- **Appointment Scheduling System:** Engineered a dynamic appointment booking feature to allow users to schedule therapy sessions, complete with calendar integrations and automated reminders.
- Deployed the backend and frontend services on AWS with containerization and CI/CD pipelines for scalable and reliable operations.
- Conducted extensive functional, integration, and performance testing to ensure a high-quality user experience and platform stability under load.

Objective

Driven and detail-oriented **Web Developer** with a specialization in **backend development** and a solid understanding of **frontend technologies**, seeking a challenging role in a dynamic environment where I can leverage my expertise in building scalable, secure, and intuitive web applications. I aim to contribute to impactful projects while improving my technical skillset and advancing my career in software development.

Languages

Go **Python** **JavaScript** **Node js**

Typescript

Technologies

SQL **AWS** **GraphQL** **NOSQL**

Progressive Web Apps **Git** **Docker**

MongoDB

Frameworks & Libraries

React **Next js** **Tailwind**

Tools

Git **VS Code** **Jira** **Intellij**

Postman **Jest**

Education

Bachelor - ComputerScience
Tribhuvan University
